FULLSTACK DEVELOPER

ABOUT ME

I am a Fullstack Developer with more than two years of experience, I am a very proactive person eager to learn, I thrive in collaborative environments. I am actively seeking a dynamic work setting that presents both challenges and opportunities for professional advancement and skill enhancement.

WORK EXPERIENCE

Fullstack developer

KnowmadMood   Sept 2023 - Present

• Specialized in React for building responsive and dynamic user interfaces that enhance user engagement.
• Proficient in Git for effective version control and collaborative coding.
• Strong communicator with a keen focus on problem-solving to optimize workflow and ensure project excellence.
• Experienced in Java microservices, ensuring robust backend solutions.

Fullstack developer & QA Automation Engineer

GoTrendier   Jun 2022 - Sept 2023

• Spearheaded front-end development with React, innovating new interfaces and enhancing current frameworks.
• Fostered collaboration with UI/UX teams to execute design modifications and elevate user experience.
• Engineered robust back-end solutions utilizing NodeJS to address complex problems.
• Engaged in rigorous code reviews, delivering constructive feedback to peers on code excellence and testability.

Fullstack developer

Mytic Innova   Nov 2021 - Jun 2022

• Engineered robust REST APIs with Java, enhancing server-client communication and application efficiency.
• Conducted meticulous API endpoint testing via Postman, guaranteeing data integrity, security, and high performance.
• Developed and implemented extensive Jest-based frontend testing for React applications, elevating code quality and early issue detection.
